Contents

Letters to the Editor

The extended infrared radiation from the L 1551 bipolar flow $L_0 > 19\,L_\odot$
Clark, F.O., Laureijs, R.J., Chlewicki, G., Zhang, C.Y., van Oosterom, W., Kester, D. L1

Autoionizing levels in Si II and identifications of the 1400 Å feature of Ap-Si stars
Artru, M.-C. L5

The wind of NGC 2024-IRS 2: high resolution spectroscopy of Brackett lines
Chalabaev, A.A., Léna, P. L7

Detection of interstellar ^{13}C isotopes of C_3H_2
Gómez-González, J., Guélin, M., Cernicharo, J., Kahane, C., Bogey, M. L11

5 cm OH absorption toward the megamaser galaxy IC 4553
Henkel, C., Batrla, W., Güsten, R. L13

Cosmology

Self-focusing as a mechanism of the formation of dense structures in Newtonian cosmology
Kates, R.E. 1

Nature of the $z_a \sim z_a$ absorption line systems in the QSOs PKS 1912-54 and PKS 2135-14
Bergeron, J., Boisse, P. 6

Extragalactic astronomy

Investigation of a complete sample of flat spectrum radio sources from the S5 Survey. I. Analysis
Eckart, A., Witzel, A., Biermann, P., Johnston, K.J., Simon, R., Schalinski, C., Kühr, H. 17

408 MHz variability of complete samples of radio sources
Gregorini, L., Ficarra, A., Padrielli, L. 25

The ultraviolet of infrared continuum of ten narrow emission line active galaxies
Boisson, C., Durret, F. 32

Composite models for the narrow line region of galactic nuclei. IV. The intermediate Seyfert galaxies
Contini, M., Aldrovandi, S.M.V. 41

The distribution of mass in the Sombrero galaxy, NGC 4594
van der Burg, G., Shane, W.W. 49

Self-consistent probabilities for gravitational lensing in inhomogeneous universes
Ehlers, J., Schneider, P. 57

Mk 380: a Seyfert galaxy at $Z = 0.475$
Gilmozzi, R., Clavel, J., Wamsteker, W., Prieto, A. 62

Radio continuum observations of low-surface brightness dwarf galaxies
Klein, U. 65

Spectroscopic observations of faint Hα emission line galaxies
Prieto, A., Wamsteker, W., Danks, A.C., Kunth, D., Vitores, A. 253

(RN) Search for ^{12}CO emission from twelve irregular dwarf galaxies
Israel, F.P., Burton, W.B. 369

(RN) Is NGC 3347 a variable spiral galaxy?
Hamuy, M., Maza, J. 371

Formation, structure and evolution of stars

SS 433 extended radio structure observed with the European VLBI Network
Fejes, I. 69

A new model of the eclipsing system RZ Ophiuchi
Knee, L.B.G., Scarfe, C.D., Mayor, M., Baldwin, B.W., Meatheringham, S.J. 72

And if population III were population II?
Cayrel, R. 81

Convective turbulence with rotation and magnetic fields
Canuto, V.M., Hartke, G.J. 89

Collective properties of a magnitude-limited sample of cataclysmic binaries
Ritter, H. 105

Influence of abundances on mass-loss determination for WC stars
van der Hucht, K.A., Cassinelli, J.P., Williams, P.M. 111

The dynamics of a variable star. Phase-space reconstruction and dimension computation
Auvergne, M., Baglin, A. 118

Period changes in CY Aquarii
Rolland, A., Peña, J.H., Lopez de Coca, P., Peniche, R., Gonzalez, S.F. 125

Meridional flow in a self-gravitating body. I. Mechanical flow in a barotropic star with constant specific angular momentum
Eriguchi, Y., Müller, E., Hachisu, I. 130

Intercontinental simultaneous survey of the unique cepheid HR 7308 in photometry and radial velocity
Burki, G., Schmidt, E.G., Arellano Ferro, A., Fernie, J.D., Sasselov, D., Simon, N.R., Percy, J.R., Szabados, L. 139

The evolution of massive close binary systems with mass loss and overshooting. III. Mass transfer in very massive systems
Sybesma, C.H.B. 147

HD 126859: a low-amplitude multiperiodic Delta Scuti star
vander Linden, D., Sterken, C. 155

Binaries among bright stars: systems with evolved primary components and their relation to the properties of main-sequence binaries
Halbwachs, J.L. 161

A soft X-ray observation of ω Centauri with *EXOSAT*
Verbunt, F., Shafer, R.A., Jansen, F., Arnaud, K.A., van Paradijs, J. 169

(RN) OH circumstellar masers in association with IRAS sources
Sivagnanam, P., Le Squeren, A.M. 374

(RN) Light-time effect in IM Aurigae
Bartolini, C., Zoffoli, M. 377

Stellar atmospheres

Radiative convection in a stratified atmosphere
Legait, A. 173

Spectropolarimetry of magnetic stars. I. Diagnostic contents of Stokes *I* and *V* line profiles
Mathys, G., Stenflo, J.O. 184

High resolution analysis of a star in the young SMC globular cluster NGC 330
Spite, M., Cayrel, R., Francois, P., Richtler, T., Spite, F. 197

Time-dependent diffusion of elements in stars. I. A method for numerical simulation of diffusion in stellar envelopes
Alecian, G. 204

The polarized dust shell around α Orionis. I. New *UBV* measurements
Le Borgne, J.F., Mauron, N., Leroy, J.L. 211

The polarized dust shell around α Orionis. II. The silicon fractional condensation, mass-loss rate and grain radius
Mauron, N., Le Borgne, J.F. 217

(RN) Consistent approximation of the viscous terms for subsonic flows
Legait, A. 380

Diffuse matter in space (including HII regions and planetary nebulae)

Multi-component velocity structure of the local interstellar medium
Lallement, R., Vidal-Madjar, A., Ferlet, R. 225

H_2O masers associated with IRAS sources in regions of star formation
Wouterloot, J.G.A., Walmsley, C.M. 237

Cn 1-1: a peculiar compact planetary nebula
Bhatt, H.C., Mallik, D.C.V. 248

(RN) Observational upper limits for the CS^+ molecular ion in diffuse interstellar clouds
Ferlet, R., Roueff, E., Czarny, J., Felenbok, P. 259

Physical and chemical conditions in Perseus globules from NH_3 and HC_3N observations
Bachiller, R., Cernicharo, J. 262

High latitude molecular clouds: distances and extinctions
Magnani, L., de Vries, C.P. 271

(RN) A gamma-ray-imposed constraint on the mode of origin of mass 22 in astrophysical environments
Truran, J.W., Hillebrandt, W. 384

The Sun

The polarization of the O VI 1032 Å line as a probe for measuring the coronal vector magnetic field via the Hanle effect
Sahal-Bréchot, S., Malinovsky, M., Bommier, V. 284

Non-thermal excitation and ionization of hydrogen in solar flares. I. Effects on a flaring chromosphere
Aboŭdarham, J., Hénoux, J.C. 301

Acoustic waves in the solar atmosphere. VIII. Extrapolation of the solution in time
Ulmschneider, P. 308

Velocities in solar magnetic fluxtubes
Solanki, S.K. 311

The lifetime and evolution of solar granules
Dialetis, D., Macris, C., Prokakis, T., Sarris, E. 330

Magnetic flux tubes in solar cosmic ray heavy ion acceleration
Vahia, M.N. 335

The solar system

Pre-perihelion photometry of P/Halley (1982i) at Catania (Italy) Observatory
Catalano, F.A., Baratta, G.A., Lo Presti, C., Strazzulla, G. 341

Physical and chemical processes

Adiabatic jets from funnels of thick disks
Lu, J.F. 346

Extinction spectra of amorphous carbon submicron grains in the UV-visible range
Colangeli, L., Capozzi, V., Bussoletti, E., Minafra, A. 349

Instruments, data processing, and computational methods

Generalized Compton-Getting transformation for non-relativistic particles
Stevens, G.A., Hoyng, P. 354

VLBI fringe-fitting with antenna-based residuals
Alef, W., Porcas, R.W. 365

(RN) Echelle background correction
Gehren, T., Ponz, D. 386

(RN) The non-linearity of the ESA Photon Counting Detector
Llebaria, A., Nieto, J.-L., di Serego Alighieri, S. 389

Abstracts of articles which have been published in A. & A. Suppl. Ser. 66, No. 2

Common Proper Motion stars in the AGK 3
Halbwachs, J.L. 392

Morphology of the ionized gas in the spiral galaxy NGC 6946
Bonnarel, F., Boulesteix, J., Marcelin, M. 392

A grid of star cluster properties for stellar population synthesis
Bica, E., Alloin, D. 393

Automated two-dimensional classification from multicolour photometry in the Vilnius system
Smriglio, F., Boyle, R.P., Straizys, V., Janulis, R., Nandy, K., MacGillivray, H.T., McLachlan, A., Coluzzi, R., Segato, C. 393

Evolutionary models for low and intermediate mass stars with convective overshooting
Bertelli, G., Bressan, A., Chiosi, C., Angerer, K. 393

Analysis of the flare activity of AD Leo
Pettersen, B.R., Panov, K.P., Sandmann, W.H., Ivanova, M.S. 394
